# The Covid-19 Pandemic – Perspectives from Bali

Presented by Jackie Pomeroy  
April 7, 2021

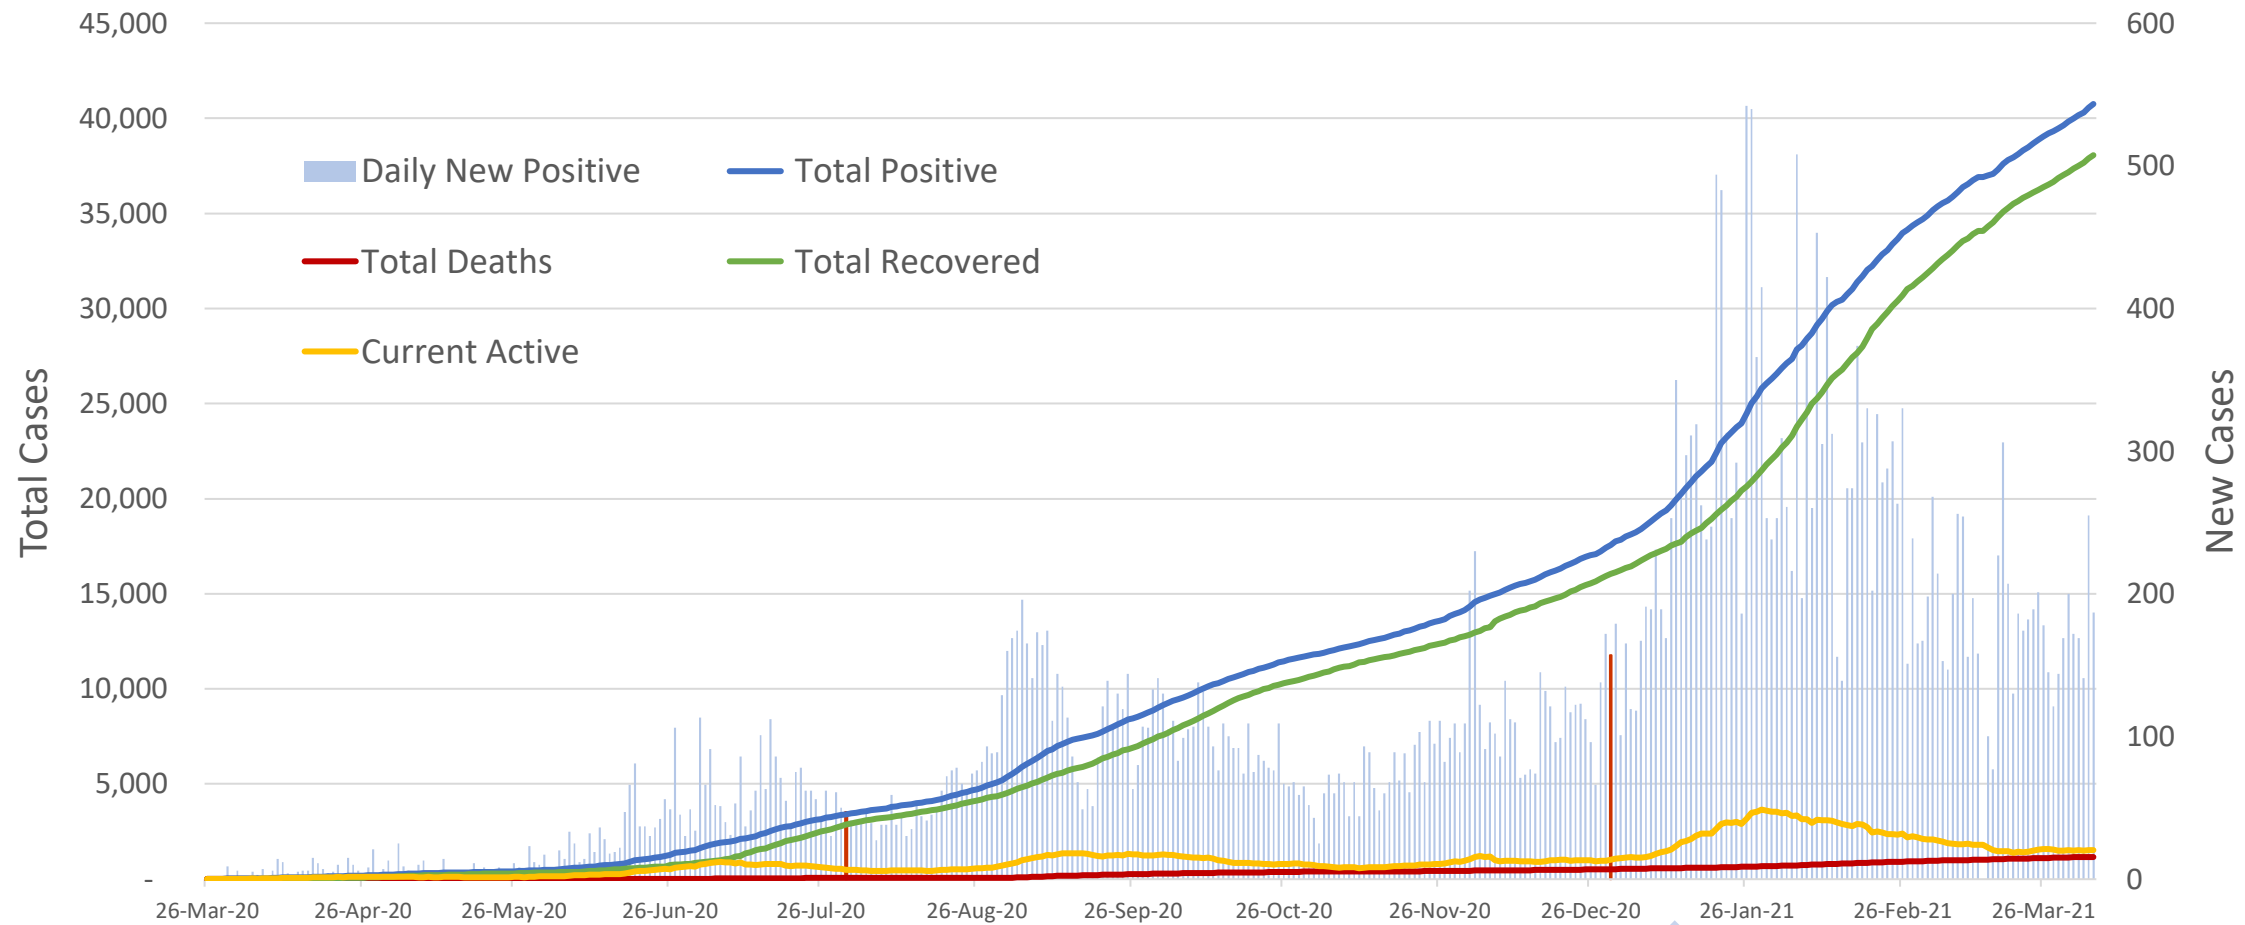

# Main Data Sources

- ONLY official data sources & news media, no rumors, conjecture or theories.
- National Covid-19 Task Force (BNPB presents Ministry of Health Data)
- kawalCovid19.id – public health professionals who collect national data, make it publicly available through a Google drive, and present it in logical formats in social media.
- Bali Covid-19 Task Force, which consolidates data submitted daily by the Kabupaten/Kota
- Kabupaten Covid-19 Task Force web sites

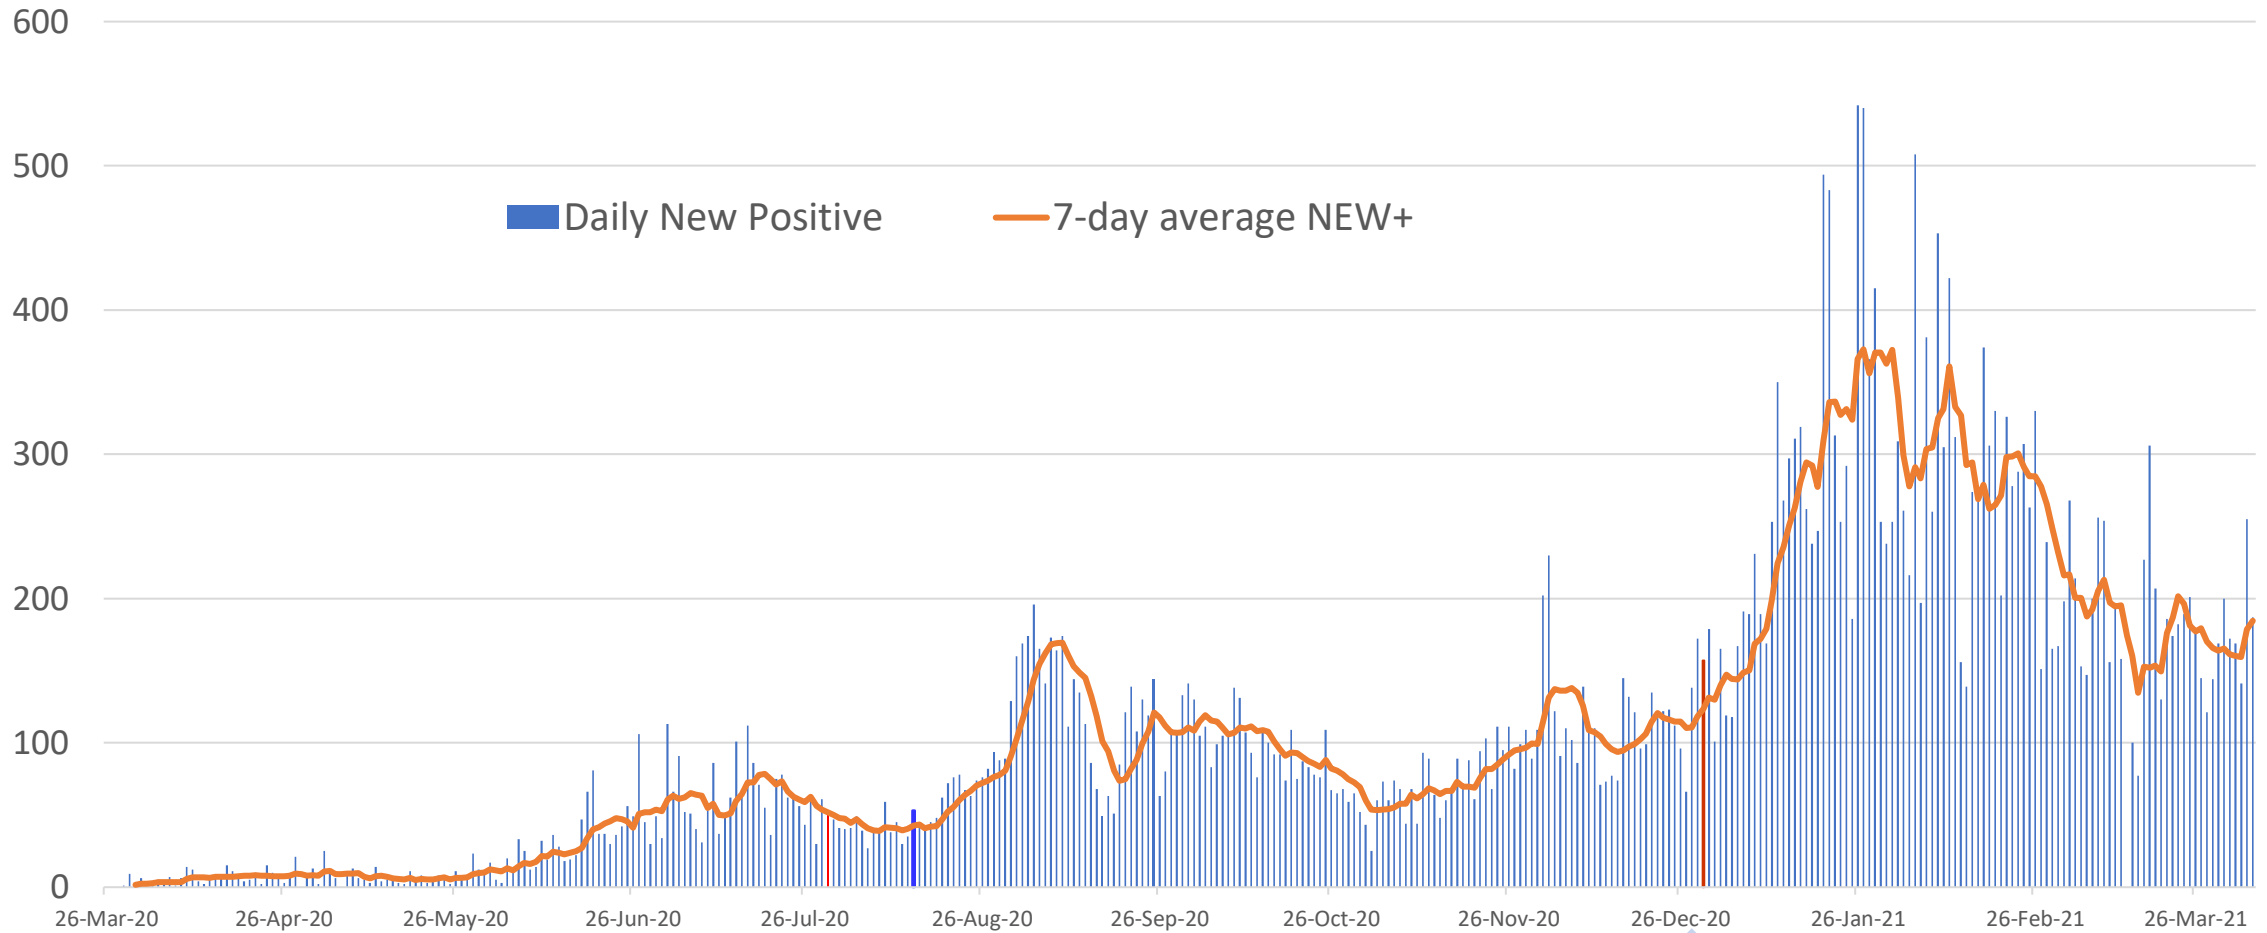

# Covid-19 in Bali

data source: Bali Department of Health  
*(compiled by JPomeroy for Bali Covid-19 Update)*

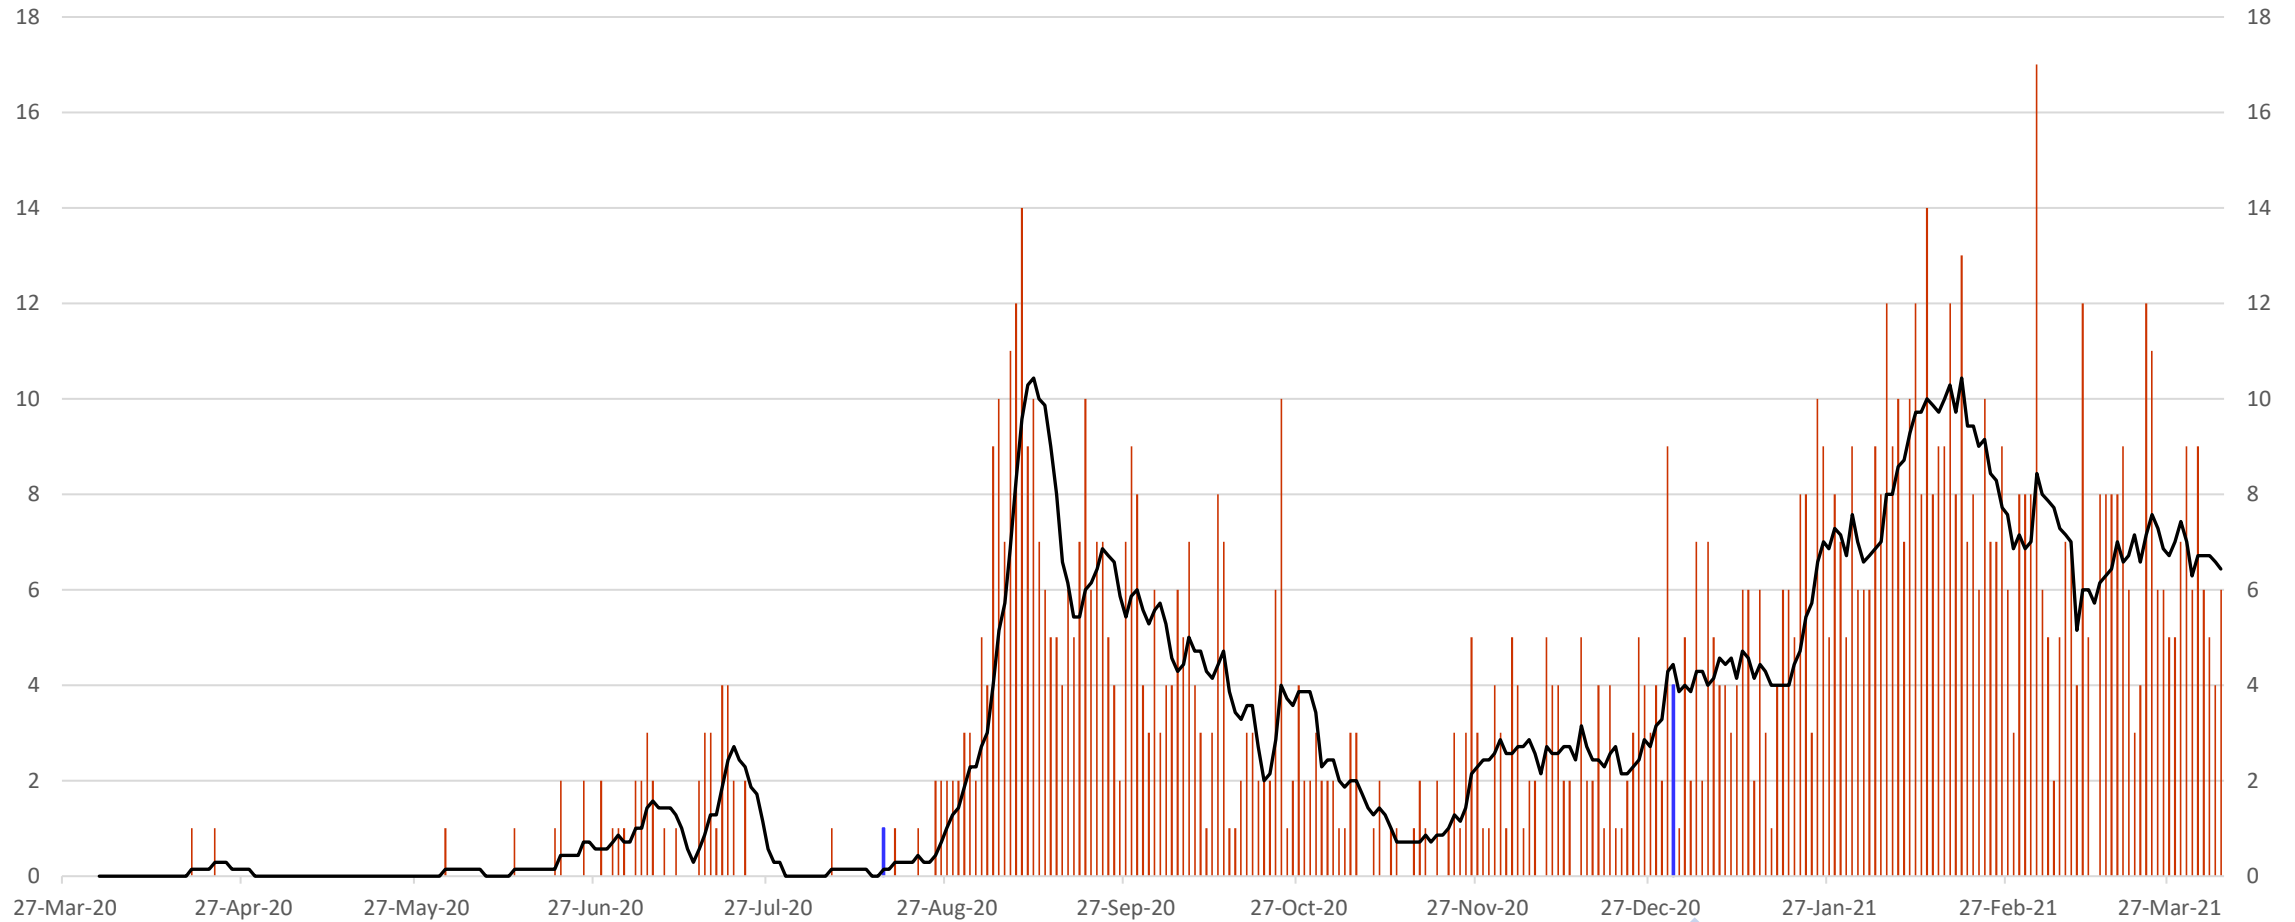

# Bali Covid-19 Daily New Positive Cases

data source: Bali Department of Health  
*(compiled by JPomeroy for the Bali Covid-19 Update)*

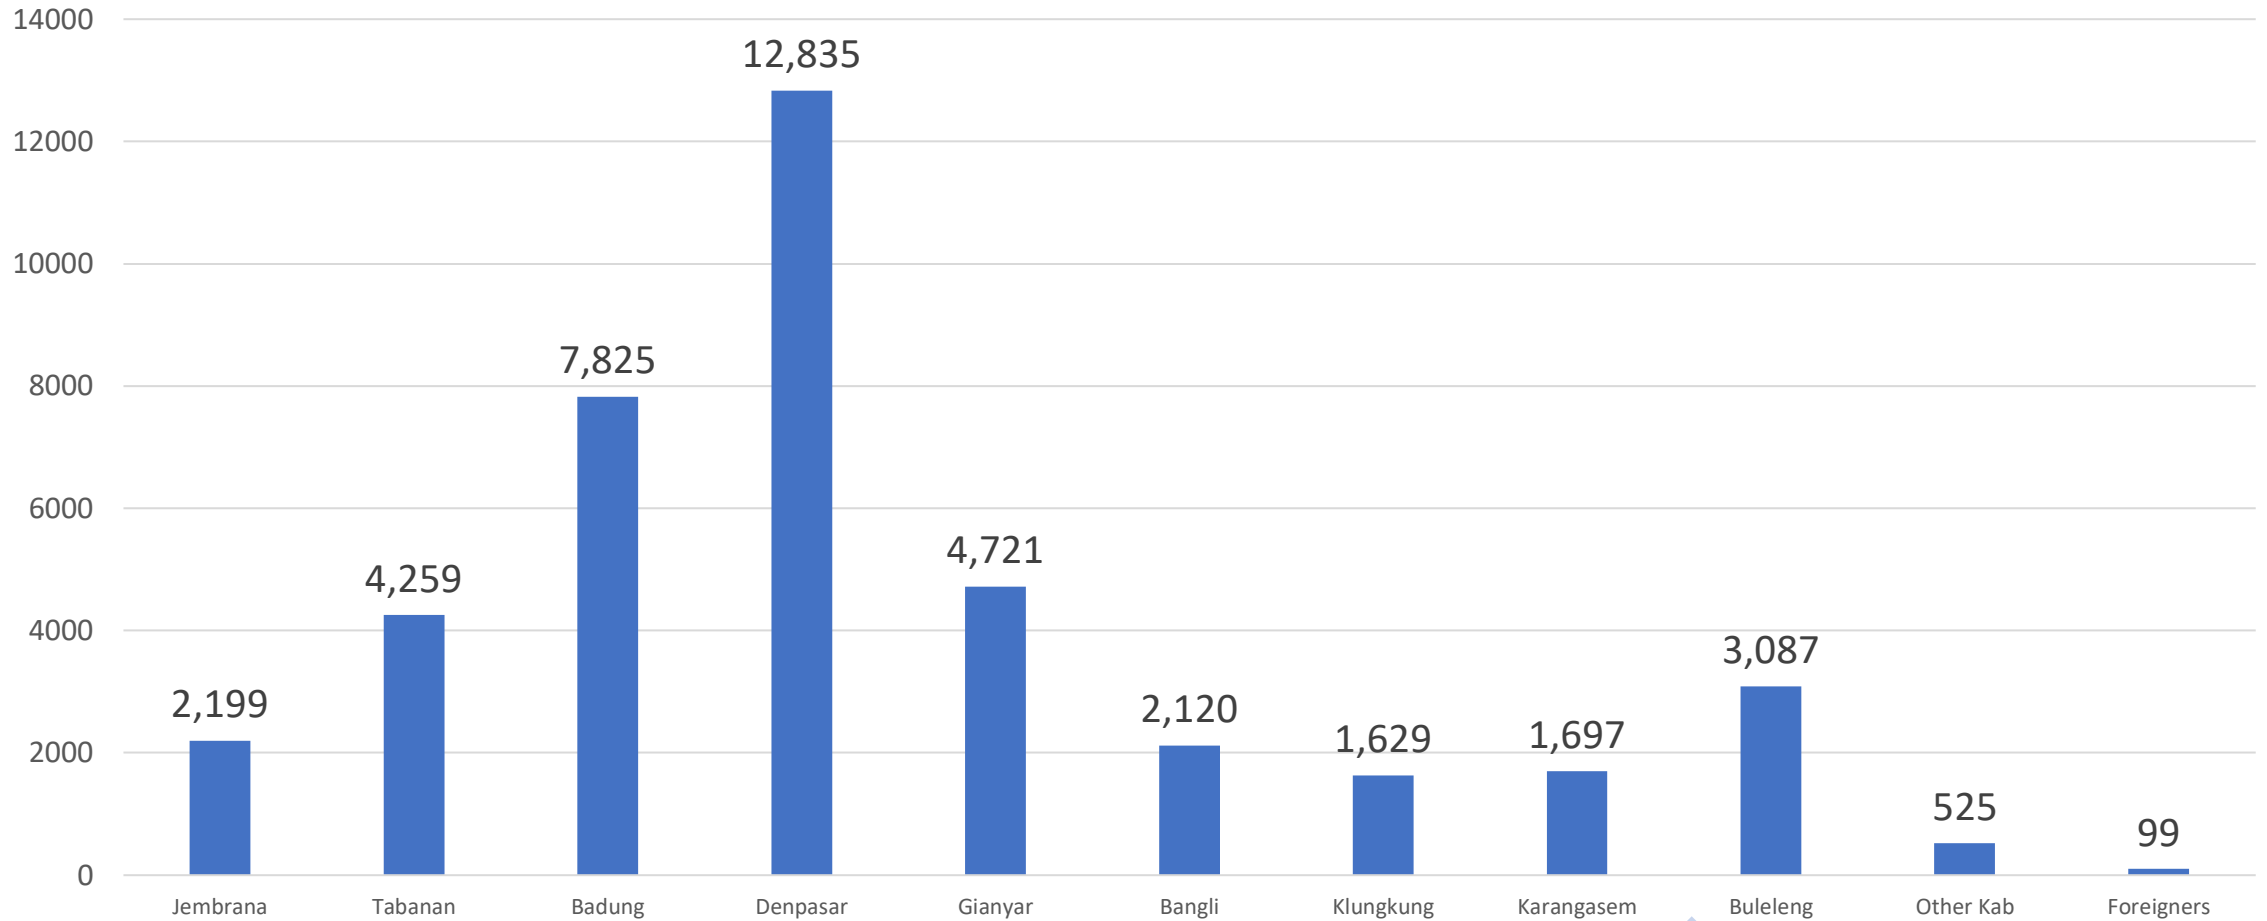

**Bali Covid-19 Deaths, daily & 7-day average**  
data source: Bali Department of Health  
*(compiled by JPomeroy for Bali Covid-19 Update)*

## Cumulative Positive Cases by Source as of April 6, 2021

# Indonesia's Vaccination Program

- All vaccines from the Government are FREE, no matter where they are dispensed.
- Phased program. Health workers first, followed by public workers and seniors, then targeted industries (i.e. tourism), then working-age public.
- As of April 6, 2021, average 7-day vaccination doses were 293,056 per day on a cumulative total 13,452,610 doses.
- Supply constraints affect vaccination rate.
- Sinovac (28 million + 10 million in April) and AstraZeneca (1.1 million) brands have been used to date.
- Foreigners with NIK are eligible to be vaccinated based on location of residence or work – same as Indonesians.
- While the regulation enabling private provision of vaccines has been signed, the scheme is not yet operational (few details are available).

# SITUASI VAKSINASI COVID-19

06 April 2021  
Update 18:00 WIB

## Target Sasaran Vaksinasi

**40.349.049**

### Tahap I

**SDM Kesehatan 1.468.764**

### Tahap II

**Petugas Publik 17.327.167**

**Lansia 21.553.118**

## Status Vaksinasi

### Vaksinasi-1

**9.021.106**

### Tahap I

**1**

**2**

### SDM Kesehatan

Sudah Divaksin 1.444.800 1.300.745

Tunda 152.008 6.701

### Tahap II

**1**

**2**

### Petugas Publik

Sudah Divaksin 5.763.219 2.730.226

Tunda 120.530 5.968

### Lansia

Sudah Divaksin 1.813.087 400.533

Tunda 37.064 491

## Cakupan Vaksinasi

(sudah divaksin/target sasaran vaksinasi)

### Vaksinasi-1

**22.36%**

### Vaksinasi-2

**10.98%**

### Tahap I

**1**

**2**

**SDM Kesehatan 98.37% 88.56%**

### Tahap II

**1**

**2**

**Petugas Publik 33.26% 15.76%**

**Lansia 8.41% 1.86%**

# The plan for Green Zones to open to international tourism

- Three initial Green Zones:
  - 1) Ubud (Central Ubud, Petulu, Sayan, Kedewatan),
  - 2) Sanur (Sanur Kaja, Sanur, Sanur Kauh),
  - 3) Nusa Dua (Jimbaran, Benoa, Tanjung Benoa).
- Mass vaccinations in those areas – ALL residents and workers.

## **Implementation? Few facts, some rumors and lots of questions**

- June-July?
- Only fully vaccinated visitors
- Direct flights to Bali
- PCR test on arrival and two nights quarantine in Green Zone required
- Controlled travel into/between zones?
- Restricted to Green Zones or free to roam?
- Foreigners already in Bali?
