**GUEST SPEAKER: JACKIE POMEROY – THE COVID-19
PANDEMIC- PERSPECTIVES FROM BALI**

Jackie Pomeroy

Background: As an applied microeconomist and Southeast Asia specialist by training, American Jackie Pomeroy has lived in Indonesia since 1990h when she initially took a one-year contract to work with the Indonesian Ministry of Trade. After seven years, she moved to the World Bank with acquired expertise in domestic trade. She has since undertaken assignments throughout the region and now does consultancies in rural livelihoods and community development. Jackie is a woman of many parts who has achieved legendary status among social media users via her creation of a Facebook Group focused on the eruption of Bali's Mount Agung Volcano in

September 17, which at that time she was a guest speaker at RCBS. Now she joins us again to speak about COVID-19 in Bali.

COVID-19 in Bali:

Jackie collects data and her main sources of **Data regarding COVID- 19 in Bali are:**

- ONLY official data sources and news media, no rumors, conjecture or theories.
- National Covid-19 Task Force (BNPB presents Ministry of Health Data)
- Kawalcovid19.id- Public health professionals who collect national data, make it publicly available through a Goggle drive, and present it in logical formats in social media.
- Bali Covid-19 Task Force, which consolidates data submitted daily by the Kabupaten/Kota
- Kabupaten Covid-19 Task Force web sites

Indonesia's Vaccination Program:

- All vaccines from the Government are FREE. No matter where they are dispensed.

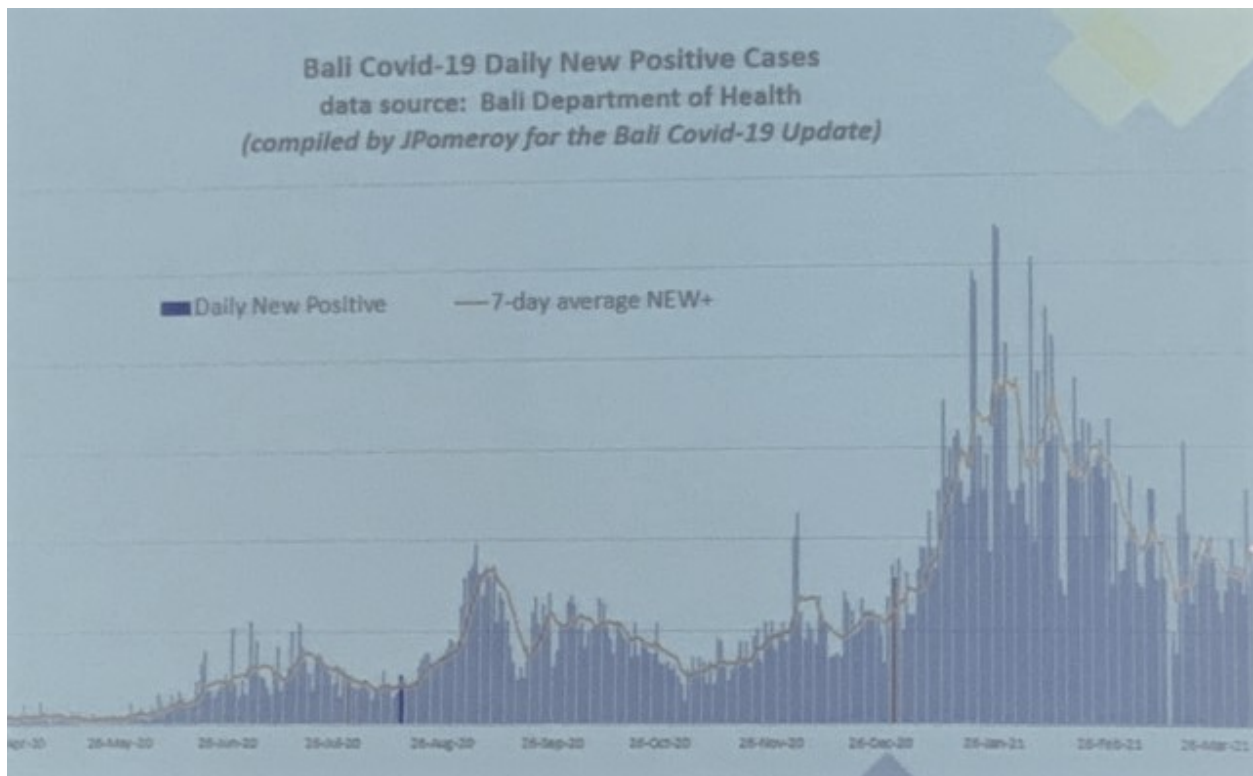

- Phased program. Health workers first, followed by public workers, and seniors. The targets industries (i.e. Tourism), the working-age public are afterwards.
- As of April 6, 2021, average 7-day vaccination doses were 293,056 per day on a cumulative total of 13,452,610 doses.
- Supply constraints affect the vaccination rate.
- Sinovac (28 million + 10 million in April) and Astra Zeneca (1.1 million) brands have been used to date.
- Foreigners with a NIK number are eligible to be vaccinated based on location of residence and work, same as Indonesians.
- While the regulation enabling private provision of vaccines has been signed, the scheme is not yet operational (few details are available).

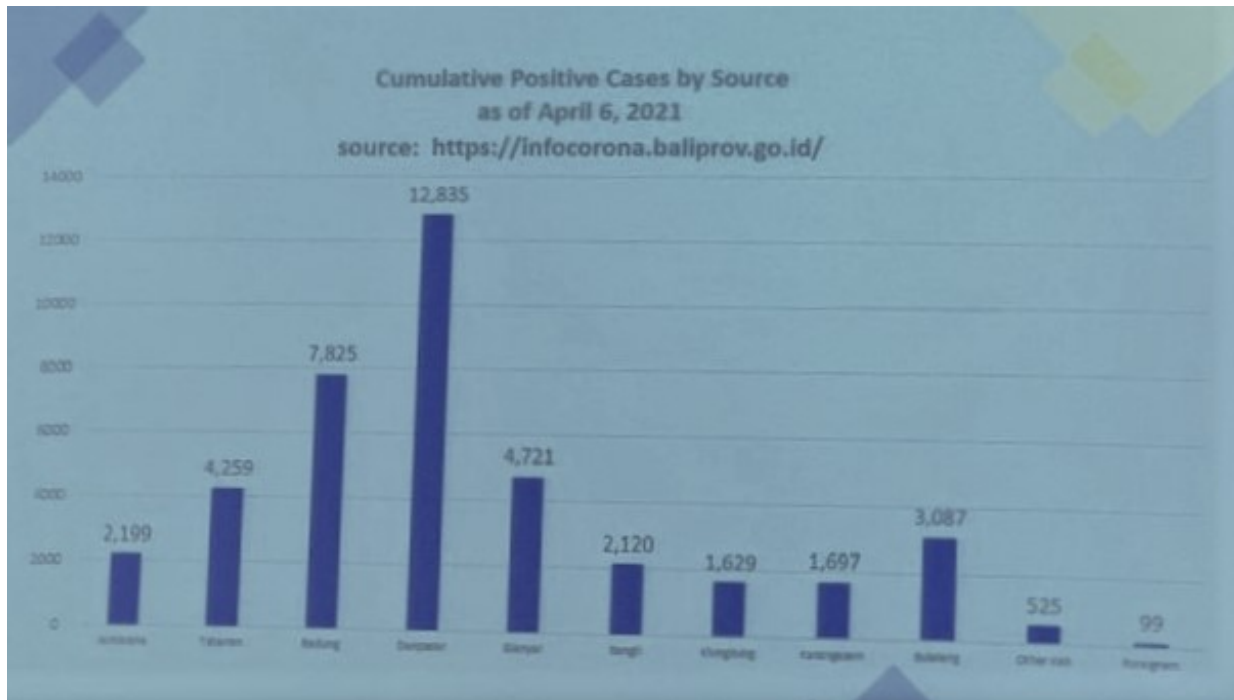

The Plan for Green Zones to Open to International Tourism

- Three initial Green Zones:
 - 1.Ubud (Central Ubud, Petulu, Sayan, Kedewatan).
 2. Sanur (Sanur Kaja, Sanur, Sanur Kauh)
 - 3.Nusa Dua (Jimbaran, Benoa, Tanjung Benoa)
- Mass vaccination in those area- ALL residents and workers.

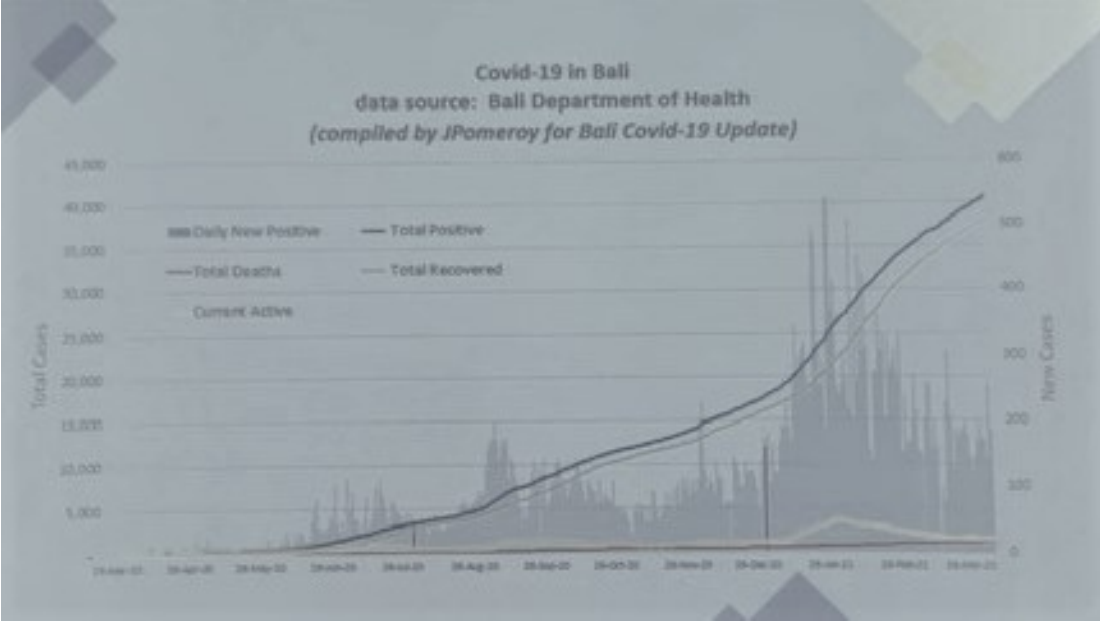

- Implementation? Rumors only and lots of questions.
1. June- July ?
 2. Only fully vaccinated visitors
 3. Direct flights to Bali
 4. PCR test on arrival and two nights quarantine in Green Zone required
 5. Restricted to Green Zones?
 6. Controlled travel into/between zones
 7. Foreigners already in Bali?

Statistics:

The highest cases are in the areas of Denpasar, Badung, Tabanan and Gianyar, where 75% of the COVID case are located. Accurate reporting areas have been Karangasem and the worst has been the Gianyar Regency. The number of deaths increased with the acceptance of Domestic tourism, especially during the Christmas Season/New Years. The area of Singaraja is has a high incidence of cases, due the occupation of truck drivers to permeate this area.
